Press Release

Unibased Systems Architecture Reaffirms Tobacco-Free Policy

Chesterfield, MO., July 16, 2007: Unibased Systems Architecture, Inc. (USA), the leading provider of enterprise-wide resource management solutions to the healthcare industry, today announced a reaffirmation of their tobacco-free policy. USA aims to be totally tobacco-free by December 31st, 2007, and the corporate headquarters will be tobacco-free inside and outside the premises to promote a healthy and productive work environment for all employees.

Nationally, major employers ranked the use of tobacco products among the top three employee health problems along with high blood pressure and obesity. Tobacco use, which includes second hand smoke and lingering molecular residues associated with breath, clothes, and body, is dangerous to the health of other employees. Tobacco users cost employers on average \$1,000 more in annual healthcare costs than other employees. According to the National Business Group on Health, 50% of smokers say they take between 3 and 6 smoking breaks per day at work that last between 5 and 15 minutes. Smokers, on average, miss 6.16 days of work per year, due to sickness, while non-tobacco users miss 3.86 days on average. The worldwide trend is toward a 100% tobacco-free workplace.

About Unibased Systems Architecture (USA): Celebrating its 21st year in the HIT industry, USA's reputation for product quality, reliability, and supporting services has no equal. USA and its products have maintained highest rankings from the KLAS™ independent reporting for the last eight years. USA markets various products which are open, scalable, integrated client/server and web enabled solutions, designed to meet the unique needs of sophisticated enterprise organizations. USA has major solution offerings in the HIT and air travel markets, providing real time production scheduling, human resource, security and financial systems. In the HIT industry, RMS is an integrated solution which schedules and tracks patient resource needs from pre-access through follow-up. RMS also monitors the effectiveness of clinical programs, financial productivity and capacity management. ORMS is an integrated module which addresses OR scheduling, surgeon preferences, suite utilization, materials management, clinical worker training and certification. RMS/ORMS results in significant improvements in physician and patient relations. USA products and services are available through direct sales, marketing partners, value added resellers and system integrators. USA is a private corporation founded in 1986, and is based in Chesterfield, Missouri. Visit USA on the web at www.unibased.com.
