# Press Release

## **Unibased Systems Architecture Repeats...Top in KLAS Again!**

**Chesterfield, MO., December 18, 2007:** Unibased Systems Architecture, Inc. (USA), the leading provider of enterprise-wide resource management solutions and operating room management systems to the healthcare industry, today announced the results of the KLAS end of year survey naming USA the overall #1 KLAS rated vendor for 2007. In addition to USA's Resource Management System (RMS) leading the category of enterprise scheduling applications, the score in that category led to USA being named the top IT application in healthcare. USA's periOperative Resource Management System (ORMS) was also named #1 in the surgery management system category, resulting in a number five ranking overall, and the "Top in KLAS" ranking for both market segments in which they compete. This recognition marks five years in a row that USA has been #1 in both enterprise scheduling and surgery management system categories.

"To be named the top application in the industry for both categories is a major accomplishment," said Larry Grossman, VP Product Management & Marketing. "And to crown that recognition with a repeat as the top overall vendor in healthcare technology for two of the last three years is quite significant, especially since we were #2 in the other year. It clearly illustrates our continuing commitment to provide our clients with a set of integrated applications operating on a single platform that are powerful and flexible enough for any sized organization. Because it is our clients' responses to the 40 questions in the KLAS survey that generate the industry-leading scores, we feel especially honored. It shows that an old-fashioned approach based upon building, installing and supporting a feature-rich application that really works is both recognized and appreciated. Adding an unrelenting focus on responsiveness and customer service is what our clients say really sets us apart. It starts with an application design and functionality which our clients describe as 'rock solid.' We combine that with a top-notch implementation team and a seasoned, knowledgeable and committed service department, who have an average of over 15 years experience with our application. When you call Unibased Systems Architecture, Inc., you can rely upon getting a professional on the other end who both knows the application and the unique manner in which each client has implemented the wide variety of features and functions available to them in one or both of our applications. It's an unbeatable combination!"

**About Unibased Systems Architecture (USA):** Celebrating its 21st year in the HIT industry, USA's reputation for product quality, reliability, and supporting services has no equal. USA and its products have maintained highest rankings

**For Immediate Release, December 18, 2007**

from the KLAS™ independent reporting for the last nine years. USA markets various products which are open, scalable, integrated client/server and web enabled solutions, designed to meet the unique needs of sophisticated enterprise organizations. USA has major solution offerings in the HIT and air travel markets, providing real time production scheduling, human resource, security and financial systems. In the HIT industry, RMS is an integrated solution which schedules and tracks patient resource needs from pre-access through follow-up. RMS also monitors the effectiveness of clinical programs, financial productivity and capacity management. ORMS is an integrated module which addresses OR scheduling, surgeon preferences, suite utilization, materials management, clinical worker training and certification. RMS/ORMS results in significant improvements in physician and patient relations. USA products and services are available through direct sales, marketing partners, value added resellers and system integrators. USA is a private corporation founded in 1986, and is based in Chesterfield, Missouri. Visit USA on the web at [www.unibased.com](http://www.unibased.com) or contact:
