

# Press Release

## **Unibased Systems Architecture Sets the Standard for the Industry For The Sixth Straight Year!**

**Chesterfield, MO., December 16, 2008:** Unibased Systems Architecture, Inc. (USA) was recently notified by KLAS that their Resource Management System (RMS) is the leading product in the category of Enterprise Scheduling. USA's RMS score, reported as 91.41, is well above the Top 20 leader of 85.36 (EPIC), according to the KLAS website.

USA's CEO, Larry Covington, commented, "Our continuing success year after year since 1995 is based upon simple, but unique concepts in this industry. Deliver products that work, on time, that exceed contractual obligations and client expectations. Provide all of the technical assistance needed to ensure the products significantly improve the client's environment, even if it requires assuring that resident third (3<sup>rd</sup>) party software in place works as well as it can. Finally, do these things at costs which will have a complete ROI within a year after contract execution. Finally, stay involved and support the clients' needs for the term and beyond."

Larry Grossman, Vice President of Product Management added, "USA does not allow its products to become obsolete. Products are continuously upgraded with each release in both the areas of new functional modules as well as staying abreast of technological change. Clients who initially purchased with Windows NT<sup>®</sup> in 1996 now have Windows Vista<sup>®</sup> and web-based applications as appropriate, without having to buy a new product or new release. This concept includes each Wintel upgrade over the last 15 years. Servers and workstations may become obsolete, but USA's software does not. USA has never sunset a product; and today's RMS has significantly more functionality than any other competitive product."

**About Unibased Systems Architecture (USA):** Celebrating its 22nd year in the HIT industry, USA's reputation for product quality, reliability, and supporting services has no equal. USA and its products have maintained highest rankings from the KLAS<sup>™</sup> independent reporting for the last eight years. USA markets various products which are open, scalable, integrated client/server and web enabled solutions, designed to meet the unique needs of sophisticated enterprise organizations. USA has major solution offerings in the HIT and air travel markets, providing real time production scheduling, human resource, security and financial systems. In the HIT industry, RMS is an integrated solution which schedules and tracks patient resource needs from pre-access through follow-up. RMS also monitors the effectiveness of clinical programs, financial productivity and capacity management. ORMS is an integrated module which addresses OR scheduling, surgeon preferences, suite utilization, materials management, clinical worker training and certification.

**For Immediate Release, December 16, 2008**

*more*

RMS/ORMS results in significant improvements in physician and patient relations. The newest product, ForSite2020<sup>®</sup>, integrates both RMS and ORMS with the addition of a physician portal, consumer portal, automated order creation, a business intelligence offering, ForSite Analytics, and revenue cycle functions such as validation of patient demographics, patient's current insurance eligibility checking, assurance of medical necessity compliance, and estimation of the patient's out-of-pocket expense based upon scheduled and ordered services. USA products and services are available through direct sales, marketing partners, value added resellers and system integrators. USA is a private corporation founded in 1986, and is based in Chesterfield, Missouri. Visit USA on the web at [www.unibased.com](http://www.unibased.com) or contact:
